Smithiana Bulletin 13 — Errata for Eccles, Tweddle & Skelton

Page 28.

"Tweddle, D. & N.G. Willoughby. 1979b." should read "Tweddle, D. & N.G. Willoughby. 1979." These two papers are cited correctly in the text of the paper.

The acronym for the National Museum of Namibia, Windhoek should read NMNW, and not NMW: pages 5, 8, 9, 10 and 11.

The Appendix was inadvertently omitted.

APPENDIX

Specimens examined in addition to type material and assigned to Zaireichthys lacustris

Material not included in type series due to poor condition or distortion. Collected with the holotype: SAIAB 12181, two males, one female with ripe oocytes; BMNH 1979.12.6.14-16, two males, one female with ripe oocytes; USNM 220965, two males, one female with ripe oocytes. Other localities: MFRU (no catalogue), male, 21.0 mm SL trawled in shells at depth of about 18 m off Sanga (12°45'S, 34°19'E), near Nkhata Bay; nine specimens, unsexed, trawled in 20 m in Mazinzi Bay, 7 December, 1973. SAIAB 20012, alizarin preparation dissected to demonstrate Weberian ossicles, provenance unknown.

Specimens examined in addition to type material and assigned to Zaireichthys monomatapa

Save River basin: NMZB 2481 (part of larger sample examined), 20 specimens from Popoteke River on the Fort Victoria- Birchenugh Bridge road (20°06'S, 31°00'E), 30 November, 1964, collected by F. Junor; NMZB 2268, 20 specimens from the Tanganda River (20°07'S, 32°28'E), 5 October 1967, collected by F. Junor (part examined of larger sample); AMSA/P 1816, one male 23.8 mm SL and two females, 23.0, 23.7 mm SL from Gwenora Dam on the Runde River near Selukwe, Rhodesia (now Zimbabwe) (19°45'S, 29°51'E) April 1958.

Pungwe and Buzi river basins: NMZB 2736, Seven males, 19.8-27.0 and six females, 19.6-28.1 mm SL from the Pungwe river at Katiyo Estate, Rhodesia (now Zimbabwe)/Mozambique border (18°23'S, 33°01'E) 14 June 1962, collected by G. Bell-Cross; AMSA/P 2531, one female 29.0 mm SL from tea estates on Pungwe river, 1st July 1963; AMSA/P 729, one immature 21.2 mm SL from the Pungwe River, November, 1957; NMZB 0202, three males, 26.1-30.6 mm SL and eight females, 21.7-31.5 mm SL from the Hondie River (ca. 18°35'S, 32°48'E), a southern tributary of the Pungwe, 8 April, 1958, collected by A. Maar; NMZB 0201, one male 29.2 mm SL from the Hondie River, 8 April 1958 collected by A. Maar; NMZB 2244, three males, 28.5, 30.1, 31.3 mm, one female 29.3 mm SL from the Buzi River at the bridge on the Espungabera - Gogo road (20°27'S, 32°52'E) in Mozambique, 9 December, 1971, collected by D. Broadley; NMZB 2048, one female 33.9 mm SL from the Mavira River, a tributary of the Revue River, in Mozambique, 27 September 1965, collected by D. Broadley; NMZB 2755, six females, 19.2-22.8 mm SL and one male 21.7 mm SL from the Toa River 17 miles north of the Revue River Bridge (19°30'S, 33°47'E), 7 August 1972, collected by G. Bell-Cross.
Zambezi River basin: NMZB 0081, one male 23.3, four females, 24.1-33.3 mm SL from the Shavanhohwe River a tributary of the Mazoe, on the Salisbury/Mrewa road (17°40’S, 32°35’E) 1 July 1960; NMZB 2911, two females, 37.1, 38.4 mm and one male 34.1 mm SL from the Hunyani River, a tributary of the Mazoe river, on the Salisbury/Mrewa road (17°40’S, 32°35’E) 17°40’S, 32°35’E) 1 July 1960; NMZB 0200, one immature 20.5 mm, two females, 34.5, 35.7 mm SL, from the Inyangombe River, 3 April 1958, collected by A. Maar; AMSA/P 2235, five males, 32.7-33.6, three females, 38.0-40.7 mm SL, from Ngezi Dam (18°41’S, 30°25’E) on a tributary of the Umniati River, April 1964, collected by H. Toots; AMSA/P 3729, one immature 23.6 mm, four males, 22.1—33.6 mm, six females, 34.4-41.2 mm SL, from the Hunyani River, a tributary of the Zambezi draining from south of Salisbury (1936?), collected by R.A. Jubb; NMZB 2235, five males, 32.7—33.6, three females, 38.0-40.7 mm SL, from Ngezi Dam (18°41’S, 30°25’E), 21 June 1969, collected by B.G. Donnelly; AMSA/P 2006, one immature 22.1 mm, one female 21.0 mm SL, from the Nyaozzua River entering Lake Kariba, 2 August 1973, collected by P. Skelton; SAJAB 17755, upper Mwanza River, a tributary of the lower Zambezi in southern Malawi (15°35’S, 34°30’E), collected by 17 August, 1976: one male, 31.9 mm SL, six females, 27.6, 28.5, 29.8, 32.8, 33.2, 34.5 mm SL, collected by D. Tweddle & N.G. Willoughby.

Lake Malawi catchment: Nine males, 27.7-37.7 mm and ten females, 24.8-35.6 mm SL from streams in the Lake Malawi catchment. The material was collected during October 1976 (Tweddle & Willoughby 1978) but after identification (before the existence of two species in Malawi streams was recognised) was mixed with material of Z. maravensis so that exact collecting localities are unknown. Distributed as follows: SAIAB 12180, two males, 27.7, 31.8 mm SL, one female 31.8 mm SL; BMNH 1979.12.6.26-29, two males, 28.0, 37.7 mm SL, two females, 25.9, 32.0 mm SL; MRAC 79-39-P-18-19, one male 28.0 mm SL, one female 26.3 mm SL; USNM 220964, one male 28.7 mm SL, one female 28.2 mm SL; AMNH 39114, one male 29.6 mm SL, one female 28.5 mm SL; NMZB, one male 30.1 mm SL, one female 28.6 mm SL; MFRU, one male 30.3 mm SL, one female 30.2 mm SL; SAIAB 17755, tributaries of the South Rukuru River near Rumphi (11°00’S, 33°50’E), 22-23 October, 1980: four females, 29.3, 31.4, 32.0, 32.8 mm SL, one undetermined (? male), 25.8 mm SL; SAIAB 12182, (collected with SAIAB 12180) two females, 24.8, 35.6 mm SL as alizarin preparations, all collected by D. Tweddle.

Specimens examined in addition to type material and assigned to Zaireichthys pallidus

AMSA/P 3325, two females, 19.3, 24.3 mm SL and one male 20.7 mm SL from the Zambezi River at Katima Mulilo (17°30’S, 24°11’E) 24th July 1975, coll: B. van der Waal; AMSA/P 3624, one female 23.2 mm SL from the Kwando river at Kongolo, 5 December, 1974; coll: B. van der Waal; NMZB-3644, one male 21.7 mm SL and one female 23.6 mm SL from Kwando river near Kongolo, 5 December, 1974, collected by B. van der Waal; NMZB 3710, 19 specimens unmeasured and unsexed, Kwando river near Kongolo, 3 June, 1975, collected by B. van der Waal; SAIAB 18721, a single specimen from the main stream of the Okavango River above its confluence with the Nxamasersi (18°33’S, 22°05’E) at the head of the Okavango swamps, 15 Feb, 1983, collected by G. Merron; SAIAB 17755, tributaries of the South Rukuru River near Rumphi (11°00’S, 33°50’E), 22-23 October, 1980: four females, 29.3, 31.4, 32.0, 32.8 mm SL, one undetermined (? male), 25.8 mm SL; SAIAB 12182, (collected with SAIAB 12180) two females, 24.8, 35.6 mm SL as alizarin preparations, all collected by D. Tweddle.
